SUMMARY

Engineering Professional with 8 years of experience in Manufacturing Environment. Currently seeking a career opportunity in Web Development and Data analytic field.

EDUCATION

Dec 2012   Bachelor Degree in Electrical Engineering
University of Puerto Rico; Mayaguez Campus
GPA: 3.42

EXPERIENCE

April 2021 - Present -Student - SMU Coding Bootcamp
Aspiring Full Stack Developer - Develops, tests and implements Web Applications through the use of Javascript, HTML and CSS.
- Collaborative Project involving several classmates to develop and streamline Beer Recipe API married to Food Recipe API. Users can search beers and obtain corresponding food pairs which contain a recipe for creation.
- Several Apps developed including Random Password Generator and Current Weather and forecast per city.

August 2019 – April 2021 – Dallas, TX – Pepsico
Maintenance Supervisor- Leads and directs maintenance staff in Union environment; completing repairs and preventative maintenance activities that include all Gatorade Lines as well as Utilities.
- Assists Multicraft Mechanics with problem solving, troubleshooting and execution of repairs
- Leads implementation and ongoing improvement of the BDA process.
- Major contributor and leader of the L2 28oz Gatorade overhaul/rebuild for 2020
- Helping drive PM completion of >90% by training mechanics on Infor usage and parts checkout

October 2018 – August 2019 – Dallas, TX – Owens Corning Insulation
Maintenance Supervisor- Leads and directs maintenance staff on the production line, assigning PM's, serving production needs and improving line uptime.
- Assigns PM's and other break in work daily to mechanics in Union environment
- Partner with Electrical Dept to execute repairs on equipment and prevent future equipment breakdowns

April 2015 – October 2018 – Austin, MN & Dallas, TX – Hormel Foods
Maintenance Engineer- Leads team of Maintenance craftsmen in the execution of Preventative Maintenance strategies, equipment reliability improvement, and meeting Production needs. Oversaw maintenance planning and execution for plant utilities and Animal Feed operation.
- Assigns PM's and other break in work daily to both mechanics and electricians in Union environment
- Through collaboration with Operations, determined correct course of repair in the event of major breakdowns
- Key member in multimillion dollar Spice system upgrade project. Organized and implemented a complete system of PM's and spare parts for over 100 assets with input from production, engineering and the OEM.

February 2013– March 2015 - Cedar Rapids, IA -   General Mills
Systems/Project Engineer- Leading cross-functional teams in the execution of Capital Projects to support and improve productivity and reliability of Manufacturing Operations.
- Lead the selection, testing and implementation of Equipment upgrades in order to improve production line reliability, increase operator safety, and deliver cost savings of $20,000 (Videojet Inkjet printers)

TRAINING/SKILLS

- HTML, CSS
- Cascading Style Sheets (CSS)
- Maintenance Management systems (Maximo, EAM, MP2, SAP)
- Basic Electrical wiring and equipment troubleshooting
- Javascript, jQuery, AJAX
- PowerPoint, Excel, Word, Outlook
- Object Oriented Programming
